so they hear our
message as well!

Send these guys a strong message: NO MEANS NO! We have already spoken and said NO to Boeing's extortion. The people listed above are trying to force us to vote because they believe we will crumble under pressure and agree to destroy ourselves. Call and email TODAY! Right now they only hear from the 33% who voted yes.

The company (**with help from our International**) gets to propose destructive concessions to the Union and we vote it down by 2-1.

The company (**again with help from our International**) gets to come back to the table and propose just a little less destructive offer (but more deception, coercion, and lies, while again aligning the politicians to pressure us), and we may be required to vote this again. **TELL THEM NO MEANS NO! WE ALREADY VOTED!**

When does this horrible ground hogs day end? If we are forced to vote, do we have to go back to the table; get another future-killing proposal and vote it until Buffenbarger and McNerney get the outcome they want? NO.

Why are the people pictured above working together? What agreement have they made that would turn our IP and the International against District 751?

NO MEANS NO! They are not calling for a vote because they believe in democracy. They are calling for a vote because they believe we will eventually agree to destroy ourselves. Send a strong message that you do not want another vote. Tell them we fought for generations to establish and build the pension and health care and will not give it away for \$10,000 now and another \$5,000 six years from now.

Voice your opinion & be heard so we don't face another vote!
